DETAILED ACTION

Claim Objections

1. Claims 8-10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 7 recites at least one element of Al or Ga is contained in the composite particle. However, claims 8-10 permit the absence of either Al or Ga, or both. Therefore, claims 8-10 fail to further limit the subject matter of claim 7 upon which they depend.

Claim Rejections - 35 USC § 112

2. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is indefinite because the applying step appears incomplete. How a film is formed from a conductive coating composition is not described?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 3-33185 ("JP'185").*

JP'185 teaches a phosphor having a particle diameter from 10 nm containing within it a compound containing ZnO and tin-containing indium oxide. See abstract and examples.

Information Disclosure Statement

5. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. For a foreign patent/document, a "concise explanation of the relevance, as it is presently understood by the individual designated in §1.56(c) most knowledgeable about the content of the information, of each patent, publication, or other information listed that is not in the English language." MPEP § 609.05(a)(i). The information as cited in the Search Report is inadequate to satisfy the requirement of "concise explanation of the relevance".

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Fridays.
